Graduate school of the RTG 2491:

Random walks and related random topics

17th – 21st October 2022

University of Göttingen

Adrien Boulanger (Marseille)

Hyperbolic random walks

John Mackay (Bristol)

Random groups

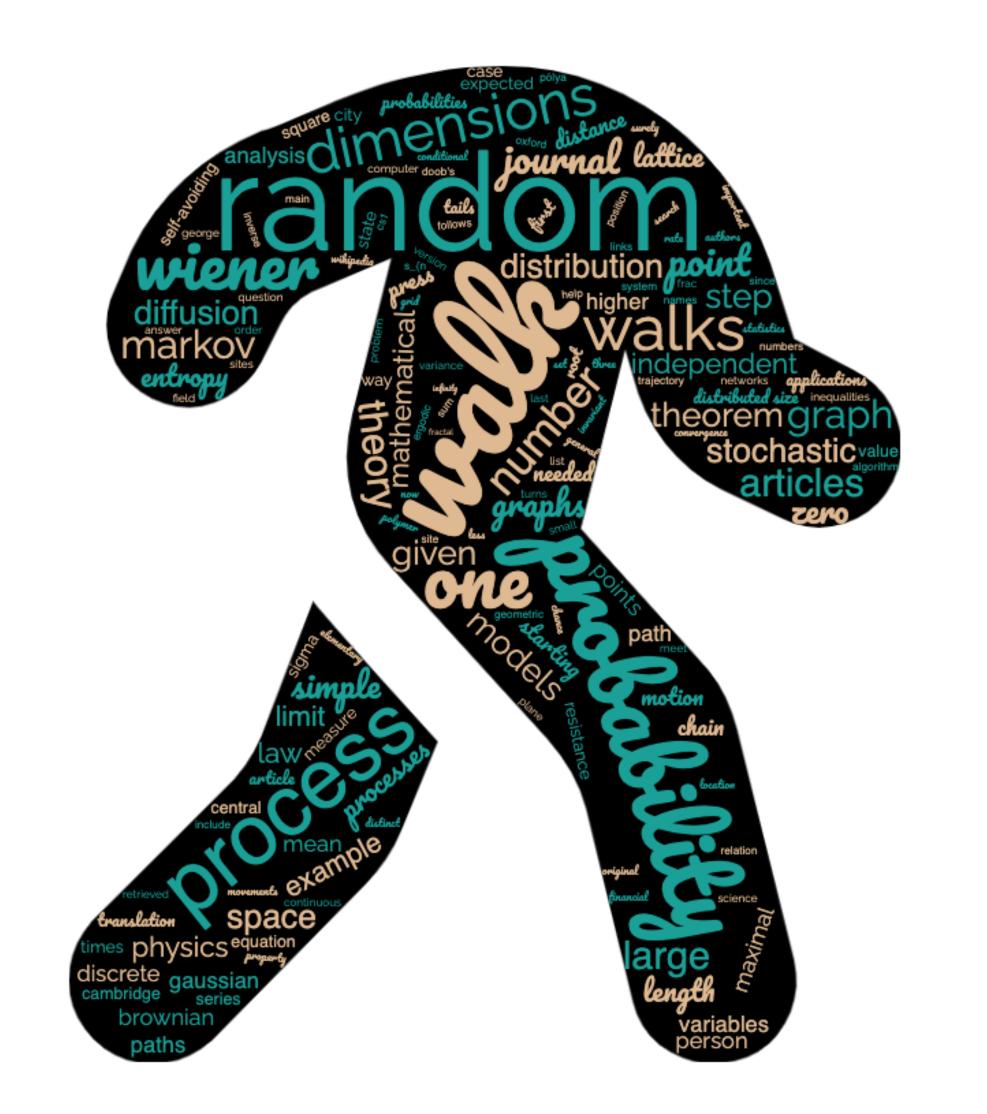

Laura Monk (Bristol)

Random hyperbolic surfaces

Tatiana Nagnibeda (Genève)

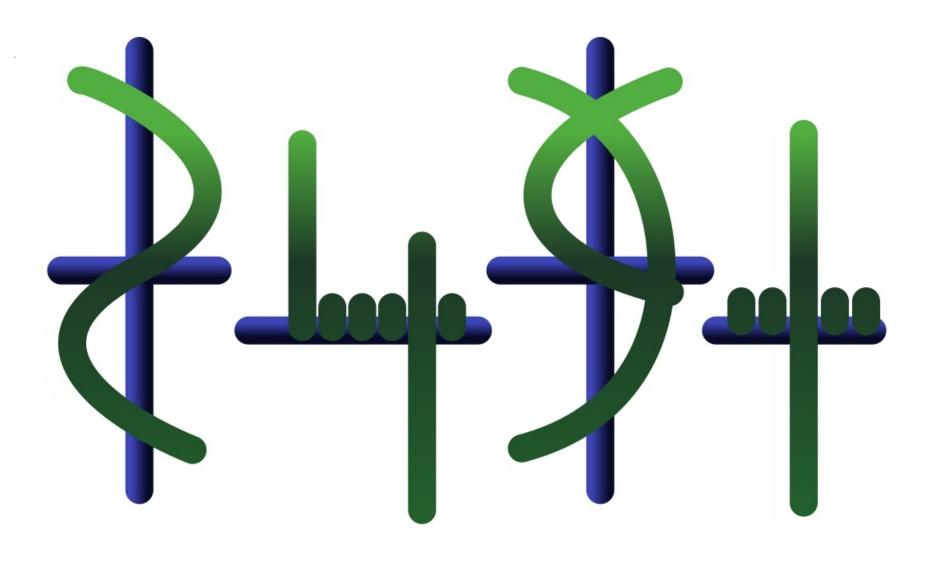

Amenability and probabilities on graphs

An autumnal graduate school on random processes and probabilistic constructions, with focus on Random Walks, Group Theory and Geometry.

Mathematisches Institut Bunsenstrasse 3–5 37073 Göttingen Germany

Organizers: Léo Bénard, Marialaura Noce Thomas Schick, Federico Vigolo

Administration: Linda Haber
